Harsch-Kern Nuptials Held at Millet

Weisenthal Baptist Church at Millet, beautifully decorated with roses, peonies and fern, was the scene of a double ring wedding ceremony at 2:30 p.m. on July 5, when Bernice Kern, daughter of Mr. Herman Kern and the late Mrs. Kern of Millet, became the bride of Raymond Harsch, son of Mr. and Mrs. Chris Harsch of Carbon. Rev. E. A. Hoffman officiated at the ceremony.

Given in marriage by her father, the bride wore a white satin gown with tucked bodice and lily point sleeves. Her train length veil was held in place by a beaded crown and she carried a cascade of American Beauty roses. Her only ornament was a rhinestone necklace, the gift of the groom.

Miss Eleanor Kern, attired in a mauve brocaded nylon gown, was her sister's maid of honor. She wore a heart-shaped hat of the same material as her gown and carried a bouquet of yellow gladioli.

Misses Delvera Kern, sister of the bride, and Enith Diede, cousin of the groom, were bridesmaids, wearing yellow brocaded nylon. Their hats, identical to that of the maid of honor, matched their gowns, and each carried a bouquet of salmon-colored gladioli.

The groom was attended by his brother, Richard Harsch,

and Norman Kern, brother of the bride. Ushers were Milton Kern and Alvin Harsch.

Miss Delores Weidman played the wedding music and Miss Junice Traster sang "The Wedding Prayer" and "Be Thou Near Them."

The groom's mother looked lovely in a blue faconne crepe dress and matching accessories. She wore a corsage of red roses.

Following the wedding a reception for 300 guests was held at the bride's home where the bride's table was centred by a three-tiered wedding cake. Rev. Hoffmann proposed the bridal

toast.

The bride and groom left for a honeymoon trip to Banff. For travelling the bride chose a navy suit with white accessories and a corsage of pink roses. On their return Mr. and Mrs. Harsch plan on doing missionary work on the Indian reserve at Hobbema.

The Carbon Community Bible School classes commence at the Carbon school at 9 a.m., Monday, July 30. Classes continue Monday to Friday for the next two weeks. Be sure to send your children to this instructive and enjoyable school.

The Farm Outlook

THERE ARE MANY HAZARDS which make it impossible to forecast the success or failure of farm crops. Until the harvest is completed, weather, insects, lack of sufficient farm workers and many other factors may affect the yield, and no matter what care or planning is exercised, there is no certainty for the farmer until the harvest is over. However, forecasts based on conditions as far as they are known or can be anticipated, are made each year and it is interesting to speculate on the returns from the year's crop in advance.

Incomes May Be Higher

Officials of the Federal Department of Agriculture and of the Dominion Bureau of Statistics have predicted that farm incomes in 1951 will not fall below those of last year, and that in all probability they will be higher than they were in 1950, when they totalled \$2,223,000,000. Farmers are faced with higher costs in producing this year's crop. The prices of farm machinery, fertilizer, feed and fuel have risen, the increases varying in different regions, and some farmers being affected more than others by this factor. However, experts believe that these will not affect the levels of farm income in the coming year.

Some Reasons For Optimism

Confidence in the stability of the farmer's incomes in 1952 are based partly on the fact that \$65,000,000 has already been paid to the farmers as the government's final payment under the British agreement. In addition, \$120,000,000 has been distributed by the Canadian Wheat Board and Canada has agreed to supply 227,000,000 bushels this year in the operation of the International Wheat Agreement. Farm incomes have risen considerably in recent years, but they have not advanced in proportion to those of Canadians in other occupations, and it is to be hoped that this year will see a bountiful harvest and a rise in the cash returns to farmers when the crop is marketed.

Victorians Shudder At Thought Of Horse Meat

VICTORIA, B.C.—Beef-eating Victorians are looking down their noses at Vancouver's horsemeat roasts.

Butchers declared flatly that Victorians are "far too fussy" to stomach horsemeat, which is selling in Vancouver.

"Wouldn't dream of stocking the stuff", one dealer said. "It would drive my clients away."

"It's the English influence, I guess," said a packing plant official. "The old beef-eater tradition, you know."

"We can't even sell cow beef over here. They want steer or heifer beef at 10 cents a pound more."

Another Victoria butcher said with raised eyebrows:

"Horsemeat, old boy? In Victoria? I should think we would shut up shop first."

DISPLAY OLD IMPLEMENTS

YORKTON, Sask.—Saskatchewan's third western development museum of obsolete farm machinery and other appliances which contributed to the development of Western Canada opened recently.

Ad Meant Sows Not Thousands

SUN CITY, Kan.—L. W. Bruner got in touch fast with his newspaper for a correction on a livestock advertisement.

After he had run a three-line notice, Bruner got calls from dozens of buyers wanting to quote a purchase price for his "lot" of pigs. That puzzled the farmer. He had only two sows and 14 pigs to sell.

A glance at the advertisement brought light. It read:

"Two thousand fourteen pigs for sale."

Agnes De Mille Compares Blue Bonnet — Likes It Best!

Here's a helpful idea from Agnes De Mille. Compare BLUE BONNET Margarine with any spread at any price. Like the noted choreographer, you'll love the delicate, sunny-sweet flavor of Canada's fine-quality all vegetable margarine. You'll appreciate BLUE BONNET's nutrition. And you'll welcome its real economy. So buy BLUE BONNET and get "all 3" — Flavor! Nutrition! Economy! Use it in cooking, on vegetables, as a delicious spread.

BLUE BONNET margarine is sold in two types — regular economy package with color wafer and also in the famous YELLOW QUIK bag for fast, easy color.

745-Pound Present From The West

A few hours after this photo was taken, this heifer buffalo was on her way to Camp Borden, Ont., from Winnipeg. She was the present of the 6th Armored Division, Royal Canadian Army Service Corps, to Camp Borden and was given an appropriate send-off complete with guard of honor, banners and band. Two years old now, "Mascot Peg" weighs 745 pounds.—Central Press Canadian.

Road Patrol Aids Drivers In Distress

CALGARY. — A visitor from Pennsylvania stood on the side of the road near Banff one recent afternoon, dismally surveying a flat tire on his car.

Dressed in neat white flannels, the tourist regretted that he was about to get very dirty changing that tire.

While he pondered the problem, two white-overalled men on motorcycles approached, stopped, and with little ceremony got down to the business of putting on the spare tire.

When it was all over, the American learned his good Samaritans were members of the Alberta Motor Association road patrol which helps motorists in distress.

The Calgary patrol is the first one in Canada, say A.M.A. officials. It operates north, south and west of Calgary on Friday evenings, Saturdays and Sundays.

The A.M.A. patrol has been operating a few weeks, and already hundreds of motorists have been assisted. Tires are changed, headlights repaired, towing trucks obtained, and maps and information supplied.

The Empire State building in New York is 1,250 feet tall.

ODDITIES IN THE NEWS

The Mayor of Quezon, near Manila, Philippines, has ordered police to "stop young men and women from using any Government telephone for unnecessary conversation, particularly love-making."

Two golfers of a threesome sank their tee shots at the same hole at Victoria, B.C., Golf Club. R. D. Clay ached his tee shot on the 125 yard eighth hole. H. F. Hepburn then stepped up and duplicated the feat. Apparently shaken by the performance, E. S. Hooper, third member of the trio, two-putted for a par three.

Food inspectors at Leeds, England, discovered a loaf of bread containing part of a dead mouse. The bakery that sold it was fined £200.

EXPENSIVE RODENTS

LETHBRIDGE, Alta.—Alberta pest controller W. A. Lobay says Canada has at least one rat for every human and they cost the country \$275,000,000 annually.

The Church of St. Peter in Rome holds 35,000 people. 2943

PEGGY

Funny and Otherwise

A young man was proudly showing an old countryman a typewriter. After a short silence the latter said, "Ah, these 'ere 'igh class things are all right, but for real good music you want to 'ear our Garge on the concertina."

Youth (to charming dinner partner): "Do you know, I told that old fool over there that the lady of the house was a perfect fright, and he turned out to be her husband."

She: "How delightful — what did Daddy say then?"

Two boys were so disorderly in school that their teacher ordered them to remain after hours and write their names 500 times.

Some 15 minutes later one of them burst out in anger and sorrow and between sobs said: "Taint fair! His name's Nye and mine's Featherstone!"

The man who marries his cook merely acquires a fireless cooker.

Showing his results to the branch manager, a new insurance canvasser seemed pleased with himself.

As he glanced at the statements, the branch manager suddenly gasped "You wrote out a policy on a ninety-three-year-old!"

"Rather," replied the canvasser in satisfied tones. "Our statistics show that few men die after ninety-three."

"I wonder what will happen when my ship comes home."

"Oh, you'll find all your friends and relations waiting on the quay."

Coming home one Sunday afternoon with a string of trout, Robbie was suddenly confronted by the local minister. There was no way of escape, but the boy rose to the occasion. Going up to the minister he said: "Minister, d'ye see what thae troots got for nabbin' worms on Sunday?"

"Daddy thinks you're just after me for my money, Cyril. Isn't he an old silly?"

"Well, er . . . I used to think so."

A minister, addressing a women's missionary meeting, said that "thousands of gallons of rum go into Africa for every brother who is sent there." Whereupon one of the sisters whispered to her neighbor, "Rather a large allowance for those missionaries."

Scientists Able To See Inside Of Solid Objects

OTTAWA—Government scientists say they can see inside solid objects, including iron, brass or lead, in much the same way that x-rays show the inside of the human body.

The National Research Council announced that for the first time its physics division has used the gamma rays emitted by a radioactive element to show what goes on inside a solid body.

The development marks up another point for the Chalk River Atomic Energy Project because it is there that the gamma rays are made possible.

This is done by taking tiny pieces of the precious metal iridium and bombarding them in the atomic reactor or nuclear furnace to make them radioactive, or able to give off the rays.

The rays are then used to show on a fluorescent screen what goes on inside a solid body.

Until now this process was all done with x-rays because only they could produce the intense degree of radiation needed. Now the same sort of results can be obtained by the very strong source of gamma rays that lies in the radioactive iridium.

The gamma rays also have a big advantage in that they are more penetrating than x-rays. They can pass through iron, brass and even lead just as easily as x-rays pass through skin and flesh and show what goes on inside the body.

They produce sharp and easily-seen images on the screen an N.R.C. scientists have seen such things as hidden flaws inside castings, nails through wood, and metal parts in plastic telephone receivers.

The machine that does all this is compact, portable and doesn't need to be connected to a power line as an x-ray machine does.

\$1,000 PAID FOR RAM AT CALGARY

CALGARY.—A. C. B. Grenville, of Morrin, Alta., paid \$1,000 for a Suffolk ram lamb at the Calgary Summer sheep sale. It was the second time \$1,000 had been paid for a ram at Calgary sales. The lamb came from the flock of P. J. Rock and Son of Drumheller.

Michelangelo refused pay for redesigning the Church of St. Peter in Rome.

Mrs. Earl Wilson Compares Blue Bonnet — Loves Its Taste!

Accept an invitation from Mrs. Earl Wilson. Compare BLUE BONNET Margarine with any spread at any price. Like the noted columnist's wife, you'll love the delicate, sunny-sweet flavor of Canada's fine-quality all vegetable margarine. You'll appreciate BLUE BONNET's nutrition. And you'll welcome its real economy. So buy BLUE BONNET and get "all 3" — Flavor! Nutrition! Economy! Use it in cooking, on vegetables, as a delicious spread.

BLUE BONNET margarine is sold in two types — regular economy package with color wafer and also in the famous YELLOW QUIK bag for fast, easy color.

—By Chuck Thurston

Alberta Farmer Does Good On Rocky, Arid Land

CALGARY.—Farming is big business for O. B. Lassiter, who estimates he spent about \$2,000 a day this spring to put in the crop on his farm 60 miles east of here. Just how big a business Lassiter makes of tilling the soil is shown by a few figures on his farming operations: Acreage, 4,500; initial expenditure, \$50,000; men, about 50; equipment, seven caterpillar diesels, seven tractors.

Lassiter is a "dry-land farmer" who learned the tricks of the trade in California before he came to Alberta in 1917. He operates on soil that 30 years ago drove out hundreds of homesteaders who could not make a go of it.

The "super farmer" is seeding nearly seven square miles, most of it virgin soil. His methods may be unorthodox but they are scientific.

Lassiter figures that the cost of operating on the rolling land, part of the old Sunshine Ranch, is 50 per cent. higher than if it were level and without rocks. More than \$1 an acre is spent on rock removal.

He said it all is a question of methods, and admitted that farming in the dry area is a risky one. He said he felt, however, that proper methods and implements could overcome the lack of moisture.

Early farmers who ventured into the area failed because of their methods and because they farmed on too small an acreage, he believes.

Lassiter's method is best explained by reviewing the manner in which he prepared the land and planted this year's crop.

The land was broken with 39-foot Graham-Hoeme three-section plows last fall and hooked from five different directions, then left to catch moisture during the winter.

Large crews of rock pickers then went to work and 16-foot double offset discs with double harrows behind broke the clods before seeding started with a new-type seed drill. Up to three double harrows were carried out after seeding.

Lassiter said he used the new Noble shoe-type press drill to "get the seed where it belongs in the firm, moist and clear seed bed." The seed is placed three inches down to take advantage of sub-surface moisture through capillary action.

The machine is being used for the first time in Alberta outside the testing ground of inventor C. S. Noble of Nobleford, Alta. It works on the principle of the old-fashioned shoe drill by dropping the seed deep in the ground through pipes.

The machine was planned as a follow-up to the Noble blade which cuts weed roots and loosens the top soil without disturbing the trash that keeps dry soil from drifting.

Artificial Respiration Is Urged

Alarmed at the number of drownings in which artificial respiration has been inadequate, Dr. Gordon Bates, director of the Health League of Canada, issued a plea that it be continued for hours — until success is achieved or rigor mortis sets in.

Dr. Bates repeated advice he made eight years ago on a radio broadcast but which, he said, people seem to have forgotten.

He warned first that carelessness is largely responsible for the drownings of 1,000 people a year in Canada. Don't take a chance, he said. When a case of apparent drowning occurs, prolonged artificial respiration is essential.

"The first thing I urged is to forget the persistent and ill-founded idea that artificial respiration is useless if a drowning victim has been under water for more than a few minutes," Dr. Bates said. "This is widely believed and it is not true."

The health officer cited examples of apparent victims who had been under water for up to half an hour but were revived after prolonged respiration.

In giving respiration, he added, it should be made certain that the victim's tongue is well out and that there is no obstruction in his mouth or throat. He should be laid prone on his face on a hard surface, his head turned to one side and resting on one arm.

For exact details of the Schaefer method of artificial respiration, he said, those interested should apply to one of the several societies interested, including the St. John Ambulance Association, the Royal Lifesaving Society or the Health League.

HERE'S HEALTH

When on vacation keep in the pink. Be sure to have plenty of milk to drink. But raw milk is known to spread disease. So pasteurize yours ere you drink it, please.

Dept. of National Health and Welfare

CANADIAN FASHIONS

Irving of Montreal styles a golf dress in a viscose rayon blend with the skirt and blouse fastened with self buttons. Tee-loops on the hip-line add a gay and practical note.

HEALTH

FOOD DOLLAR NOW WORTH 40 CENTS SAYS HEALTH LEAGUE NUTRITIONIST

Cost of a basic weekly food budget for a family of four was \$10.80 in March, 1939, and is now up to \$25.95, according to Margaret Smith, Ph.D., M.Sc., director, Nutrition Division, Health League of Canada.

Writing in Health Magazine, Miss Smith points out that the wage earner in such a family, working at the current average industrial wage of \$45 per week, must now work for two and one-half weeks in every month just to buy the groceries.

"This is a serious situation from the point of view of the health of the Canadian people," writes the veteran nutritionist. "Many of our people are obviously unable to buy the foods they need for proper nutrition; and the situation is becoming increasingly serious as food prices continue to rise. One particularly unfortunate feature is that inflation seems to hit hardest the home grown foods containing proteins which are absolutely essential for health and children's development."

The current Health magazine food budget is one of a series which has traced the price rise of 55 foodstuffs from \$10.80 in March, 1939, to \$25.56

Not Even Budging It

Duggan - 1952

Frigate-Bird Fastest In Speed Of All Wildlife

—261 Miles Per Hour

IMAGINE a race, with all the different kinds of animals taking part. Who do you think would win—a bird, an insect, a fish, or a land animal?

A bird would come in first. Certain birds are the fastest living things in the world. Swifts and falcons can go 200 miles an hour. The speed champion of all birds is the frigate-bird. He holds the world's record at 261 miles an hour!

Second place in our imaginary race would be a tie. The speediest insects, fish, and land animals would all reach the goal at about the same time. They'd be the dragonfly, the swordfish, and the cheetah, a hunting leopard of Asia and Africa. These three creatures can do between 60 and 70 miles an hour.

That's pretty fast, much better than a horse, a hare, or a greyhound can do. Usually we think horses are speedy animals, but they only reach about a 45-mile-an-hour mark. A human being is even farther behind. The best we can do, without machines, is about 20 miles an hour on land, and four miles an hour in water.

All these figures are based on shortbursts of top speed. Over a long distance, every animal has to go slower than his best. He has to save up his breath and strength to last the whole trip.

When it comes to speed and endurance for a long stretch, one animal holds the world's record. This is the pronghorn, a kind of antelope that lives in the state of Oregon. The pronghorn couldn't beat a cheetah in a short dash, because 60 miles an hour is the pronghorn's top speed, and the cheetah can do 70.

But the pronghorn can keep going at 60 for quite a while, so in a longer race the cheetah would have to drop back.

Travellers often have lots of fun with these pronghorns. Since the beasts are so fast, they have lots of confidence. They aren't afraid of human beings, or anything else. They can outrun every enemy, so they feel pretty safe.

A pronghorn will come up close to the roads, and watch the cars and people whizz by. Every so often, he'll decide to race a car. He'll go bounding along smoothly at the side of the road, keeping abreast of the car. If the driver speeds up a little the pronghorn goes faster too. When the animal gets to a fence or wall, over he goes, leaping high into the air without a break in his speed.

A car has to go beyond 60 to pass the pronghorn. Usually, road conditions prevent that. The driver has to watch turns, traffic, signals, and so on. Most of the time, the pronghorn decides to end the race by breezing ahead of the auto, and then turning off into his own territory.

If you're interested, the slowest animal in the world is not the snail. A "snail's pace" has been measured, and it's actually about two feet an hour. But an earthworm can burrow through the earth an inch or so in the same time, so he "beats" even a snail for slowness.

STANDARD BRIDGE

North trapped himself by bidding Two Hearts after West had called Two Clubs over South's One Spade. East's jump to Four Clubs silenced South; West passed and North fumbled a bid of Four Spades. West was held to 9 tricks for a loss of 50 points.

It is better for North to bid Two Spades on the first round. This free raise and the inference that North is short in Clubs would probably encourage South to bid Four Spades over East's Four Clubs. If he passes, however, North can now consider a bid of Four Hearts, as the safety factor has been materially increased. Four Spades would normally present no great difficulty, and even with the adverse distribution the defence has to be on its toes to beat it.

In January, 1948, to \$24.46 in March, 1950, to the present \$25.95. It leaves the 1939 food dollar with a market value of a little over 40 cents today.

TRY AND STOP ME!

By BENNETT CLEFF

Some months ago, a collection of wealthy ornithologists triumphantly announced that they had tracked down the nesting grounds of a very elusive bird named the bristle-thighed curlew. This name, for some reason, caused readers to begin inventing ridiculous species of non-existent birds, the craziest of which were duly listed in Tide, the advertisers' magazine. Examples: The tufted dowager, red-eyed crosspatch, double-breasted seersucker, electric crane, week-end bat, vested interest, bleary-eyed hangover, and extra-marital lark.

Well done is better than well said.

On The Side : E. V. Durling

The British are on the way to becoming the world's leading consumers of horse meat. Most of the horses used for this purpose come from Ireland. Now also being exported from Ireland to be used as food for Englishmen are donkeys. Restaurants serving horse or donkey meat are supposed to announce it on the menu. Many do not, however. So English restaurant patrons often consume horse or donkey meat, thinking they are eating something else.

Find Out For Yourself

How much has the cost of living increased since before World War Two? The statistics furnished on the subject are often somewhat complicated. To get an exact picture of the situation, the thing to do is to go to the public library, ask for a newspaper file of 1938 and study the advertisements. I am sure you will find it interesting.

It's In A Song

King Frederick of Denmark is a very athletic fellow, but he smokes 60 Turkish cigarettes a day. Remember when Turkish cigarettes were so popular in this country? Everybody was smoking them. Must have been about 20 different popular brands. . . . New song out is entitled, "Three-handed woman." The leading figure of this song is described as being: "Right-handed — left-handed and underhanded."

\$6,000,000 Worth Of Dresses

Pauline Bonaparte, Napoleon's sister, who later became the Princess Borghese, was one of the greatest clothes-horses of all time. She never had less than 600 dresses in her wardrobe. She had jewelry worth the equivalent of six million dollars.

They're Scared!

Joan Rhodes is one of the most beautiful green-eyed, red-haired women in England. Has been a model. Is now a night club entertainer. She is twenty-seven years old. Recently Joan was asked: "Why have you never married?" She answered: "Nobody has ever asked me." That may be a record for a beautiful strawberry blonde. That is, to be twenty-seven years old and have had no proposals. Men are probably afraid of Joan. She is one of the strongest women in the world. She tears telephone books in half, bends steel bars, lifts a table with her teeth and tosses strong men around as if they were children. She recently lifted on to her shoulders a man weighing four hundred and forty-eight pounds. It is natural a young fellow might be afraid to marry a girl like that. Still Joan doesn't look like a strong woman. Her figure is normal: Bust, thirty-five waist, twenty-three; hips, thirty-six, weight, one hundred and thirty-seven pounds. If you know any young fellow who wants to marry a beautiful red-head, no matter how strong she is, there's his chance.

She Wasn't A Redhead

A Chicago strawberry blonde who is compiling a list of celebrated red-haired women has included Mary Queen of Scots. That is an error. Mary was a brunette. However, she did wear wigs or transformations, and it is possible she has been referred to by some historian as being red-haired. A pair of interesting facts omitted from most histories is that Mary Queen of Scots was the first woman golfer and the first to wear a white wedding gown. Before that the brides wore red.

R.C.A.F. CHANGES—The rapid expansion of the R.C.A.F. resulted in three major changes among senior personnel. (left), Air Vice Marshal F. R. Miller, CBE, formerly head of the Operations and Training Division at Air Force Headquarters, is to become Vice Chief of the Air Staff. As such, he will head the now combined divisions of Air Plans and Operations and Training. New Commandant of the National Defence College will be, (centre), Air Vice Marshal C. R. Dunlap, CBE, who recently took over the newly-formed Air Defence Command after heading Northwest Air Command, Edmonton, for the last year. Replacing A/V/M Dunlap at Air Defence Command, St. Hubert, Que., will be, (right), Air Vice Marshal A. L. James, CBE, head of the Air Plans Division at AFHQ. These three changes, resulting from a decision to amalgamate two of the four divisions at R.C.A.F. headquarters, become effective August 1st.—(National Defence Photo).

SOLUTION TO GRASS-CUTTING DRUDGERY—Clever solution to the drudgery of grass cutting has been found by "Eph" Gray, principal of Palmerston, Ont., high school. Faced with the fact that his two sons were too young to push a lawn mower, Mr. Gray ingeniously devised a machine that would make grass cutting a novelty for his sons. Six-year-old Gary Gray is shown perched on top of the "invention" which has been dubbed "Eph's monstrosity" by neighbors.—Central Press Canadian.

ORIGINAL "CREATION" OF FRENCH ARTIST—French artist Paul Arzens and his family are seen going for a spin in the revolutionary new automobile designed by the artist. The body of this extremely light-weight car is hooded in Plexiglass and weighs only 225 pounds.—Central Press Canadian.

THE BETTER TO VANQUISH THE REDS—Detailed to "operation trench digging" immediately upon arrival at Korean war front, these two members of Canada's special brigade, Pte. R. Grennan of Montreal, (left), and Cpl. A. Clarke of Springhill, N.S., appear to have accepted their fate philosophically. If the bulging biceps on "Atlas" Grennan are any indication, Canada's brigade must be in excellent condition to take on the Reds.—Central Press Canadian.

"PERRA" BELIEVED FOUND—Object of one of the largest dog hunts in Canada, three-year-old "Perra", is believed to have been captured at Ste. Genevieve, Que. The Alsatian had been missing for three days after it made its escape, shortly after it arrived in Montreal by plane from Holland. The famous dog is credited with saving his master, Joseph Silih, and family, seen above, from captivity as they fled from their native Yugoslavia to Austria in June, 1950. The Silih family are now en route to Canada to join their pet.—Central Press Canadian.

"RELIEVED" OF DUTIES—Prime minister of the Communist puppet state of Romania, Dr. Petru Groza, (above), has been "relieved" of his executive duties by his Soviet masters, although he still holds his formal title of premier. Under close surveillance by Romanian security police, Groza has been accused of deviating from Communist party line for some time by Romanian foreign minister Ana Pauker. Groza's previous duties are now being carried out by a special committee appointed by Romanian party's politburo, which takes direct orders from the Soviet embassy.—Central Press Canadian.

ALBERTA DAIRIES BUSY

During 1950 Alberta creameries produced 31,248 pounds of butter valued at \$10,561,000.

A \$125,000 GEM CACHE, the property of a Monica, Calif., woman who "forgot it" in a Montreal hotel lobby, was uncovered in a 10-cent locker in a bus terminus recently. The jewel collection, owned by Mrs. Archie B. Mayo, comprises a diamond necklace with matching earrings, a gold bracelet with a detachable pin containing diamonds and rubies, two diamond bracelets, a moonstone set of earrings, brooch ring and necklace, a set of pearl earrings and a St. Christopher medal inlaid with diamonds and rubies. The holder of the locker stub, when questioned, told detectives she picked up the bag containing the collection after two women—one of them was probably Mrs. Mayo—got up from the lounge and walked away.

BOUND FOR THE ISLE OF CAPRI—King Farouk of Egypt and his 17-year-old bride, Queen Narriman, are shown aboard the king's private yacht with members of the royal party, just before leaving the Sicilian city of Catania for the internationally famous Isle of Capri.—Central Press Canadian.

FIRST CARGO ON ITS WAY, MORE TO COME—First instalment of wheat to be shipped to India under the \$190,000,000 U.S. loan to India plan is seen going down the hatch at the Philadelphia docks, with Madame Pandit Nehru, Indian ambassador to U.S., looking on approvingly. Bill to aid India's economic recovery was signed only a few weeks ago by President Truman.—Central Press Canadian.

The Carbon Chronicle, Carbon, Alberta

WIDER VISION

Farm young people from all parts of Alberta recently returned from an enjoyable and instructive week at the University of Alberta. It was the 33rd annual Farm Young People's Week. Approximately 150 young people from all parts of the province go to the University in June of every year.

The Department of Extension in co-operation with the Faculty of Agriculture, the School of Household Economics and the School of Nursing directs this popular summer course at the University. During the week the young people get a glimpse of University life and the courses that are available for future study. This wider vision of education has been a deciding factor in the life of those who have attended this course. It is of special interest to note that the present Director of the Extension Department was at one time one of the Farm Young People attending this course. He was then President of the Junior U.F.A.

The course is open to any farm people between the ages of 16 and 27. The boys get instruction in crops and livestock. The girls study home economics and nursing. Competitions are held in grain and livestock judging and in weed identification. Public speaking is stressed and scholarships at the Provincial School of Agriculture at Olds are awarded.

The young people do not spend all their time learning about agriculture. There are many social gatherings, old time dancing, informal talks on etiquette, good appearance, theatre parties and musical evenings make up the program. The annual sports day, in which the North always competes with the South in baseball and track events, adds interest to the program. At the final banquet the young people feel as if they had completed a full course of studies at the University.

Reports given by the young people to their clubs or to the farmers' organization which sponsored them is an important part of Farm Young People's Week. The F.U.A. at Trochu were well repaid for their contribution towards Gordon Park's expenses. He gave them a very instructive account and surprised the men with the knowledge and ability he had absorbed in one week at the Uni-

versity. Minnie May Howe of Swalwell gave a very detailed account of her experiences at a joint meeting of the Swalwell Beef Club and the F.U.A. Walter Shadlock of Rosedale with longer experience at Farm Young People's gatherings amazed the gathering with the easy way he could stand up and speak to a large gathering. This young man reminds me of Don-

ald Cameron when he first came to the University to attend Farm Young People's week. In a few years Walter can be doing an important job as Donald is today in directing the Department of Extension. A wider vision is opened for all young people who have the great privilege of being at the University of Alberta for one week in June.

How To Develop A Kick In Swimming

The Up-Kick Counts: Few swimmers realize that the upward kick of the feet is the most important part of leg action in the crawl. The downward kick, if performed with conscious effort, will actually hold you back.

As a result, you would be wise to forget the down stroke in your flutter kick and concentrate on putting lots of drive into the upward motion of the legs.

As you start this upward stroke, point your toes out behind you. As the foot goes down, the toes should point downward. This will create a pedalling effect that will help you forward.

Kick Control: In the flutter kick, only the heels should break the surface of the water. When you splash a great deal, you are wasting energy and losing drive—you can't propel yourself when the foot is out of the water.

Legs Together: The knees should never be farther apart than one or two inches during the flutter kick. Too wide a position will cause you to roll as you swim. The leg movement should come from the hips, not the knees. The knees should be slightly bent and the legs as relaxed as possible. Complete relaxation is a "must" in swimming. Think of your body as a piece of jelly. Concentrate on getting the kick from the hips.

Even Kick: Tests on several expert swimmers showed that most of them were making the mistake of kicking

deeper with one leg than with the other, thus imparting a rolling motion to the body. When practising your swimming, watch this point and make sure your legs are both going to the same depth. For example, if you are kicking too deep with your left leg, you will have to stroke harder with the right arm to keep going straight.

To perfect your leg action, it is often a good idea to practice for a certain period each day using the legs only. Forget about the arms. Work on one particular point each day—the strong up-kick, then the even leg action, then kick control.

If you follow these hints carefully, you will gradually develop real drive in your flutter kick. Remember, it is the concentration on details in practice that makes the champion.

Sports College has provided sports instruction to millions of athletes and coaches through special literature, clinics and radio sessions during the past seven years. Take advantage of these valuable services by writing a letter to "Sports College, Box 99, Toronto 1, Ont.," stating that you wish to join. Membership is free. Mention the newspaper in which you saw this column.

Coaching experts and famous athletes give additional tips every Saturday afternoon on the Sports College radio session, carried by stations CBW, CBX, CBK and CFGP. Look up the time in your area and become a regular listener.

Thirst Quencher

A guaranteed afternoon tea thirst-quencher for these hot summer days—dainty sandwiches, easily made, with tall refreshing glasses of Salada Iced tea.

"MARCH OF TIMES" TO LEAVE MOVIES

NEW YORK. — The "March of Time" series of movie shorts will be discontinued this fall after 16 years. The facilities will be turned to television.

Roy E. Larsen, president of Time, Inc., said rising costs make the change necessary. He added:

"Our company has been increasingly active in recent years in developing and producing programs for television and the 'March of Time' facilities are admirably suited for the new medium."

Egbert was the first king of England. He reigned from 827 to 839.

Weekly Tip

CHEWING GUM

The white of an egg will remove chewing gum that has become stuck to clothing. Rub the egg white on the gum and it may be removed without leaving a spot.

MULE IS FOOLPROOF

LINCOLN, Neb.—A mule isn't as stubborn as some people think. That's the opinion of William J. Loeffel, professor of animal husbandry at the University of Nebraska.

"A mule is not necessarily stubborn," Loeffel said, "he's so smart he just doesn't let himself be manoeuvred into a dangerous position."

Loeffel said you can't "stampede" a mule into doing something he doesn't want to.

"A mule," Loeffel said, "is fool-proof."

—By Al Vermeer

World Happenings Briefly Told

Dominion government deposits increased \$6,081,000 to \$84,985,000 during the week ended July 12, the Bank of Canada reported in its weekly financial statement.

The chief of police in the Elcobre district of Santiago, Cuba, has been sentenced to 26 months in jail. Ivan Tamayo was convicted for carrying a pistol without a permit.

The New Zealand parliament has been dissolved and the Nationalist government will call a general election between Aug. 25 and Sept. 8, Prime Minister Sidney Holland announced.

Prince Bernhard of the Netherlands celebrated his 40th birthday recently. A small garden party was held in the palace grounds, followed by an indoor party for personal friends.

Mr. and Mrs. Earl McDonald, of Carrot River, Sask., received word recently that their son Robert had received his licence as a pilot with Trans-Canada airlines after a training course at Vancouver.

The newspaper Evening Moscow reported that Stalin received an African lion sent as a present from a South African admirer. Stalin has donated the lion to Moscow zoo, the paper said.

A man at Cleethorpes, Lincolnshire, England, was fined £2 for digging holes in the sand on the sea-shore. The court said this was really an offence that is normally overlooked in the case of children. The man was looking for lost property.

It will cost \$55,000 to restore the boyhood home of the late Prime Minister Mackenzie King in Kitchener, Ont., as a national shrine. A building permit in that amount has been issued.

POULTRY RATIONS

How much feed will a poultry flock consume? Tests at the Experimental Station, Saanichton, B.C., show that 100 laying hens will average 25 pounds of feed per day.

Be content—but never satisfied.

VANISHING SHEEP

EDMONTON.—Alberta Agriculture Department figures show the province's sheep population has been reduced to one-third of what it was six years ago.

Stretching the body is an instinctive action to accelerate blood circulation. 2943

Mean Horses Usually End Up At Rodeos

EDMONTON.—There is one thing about horses that can't be said for humans, says Herman Linder. The really bad ones have a use.

They end up with careers as bucking stock in rodeos.

And Rodeo Producer Linder of Cardston, Alta., is a man who knows all about mean horses.

He's been in the rodeo business since 1924 when, at the age of 17, he won top money at the Cardston stampede.

Linder says cowboy life is pretty much a gamble. Most are lucky if they make \$2,000 or \$3,000 a year—not counting expenses—although about 15 cowboys in the world make more than \$20,000 a year and a few more win \$10,000 to \$20,000.

One of the luckier ones, Mr. Linder hung up his chaps and spurs in 1939 and has been ranching in Southern Alberta and judging and producing stampedes since then.

He says he got out of the broncho riding life with "nothing more" than a smashed knee and a chipped spine. "A man is seldom killed by a horse," says Mr. Linder. "The Brahma bulls are responsible for most rodeo deaths."

Brahma bulls are imported from California. The bucking animals are ridden one day, then rest for two days to get back in shape.

"Like horses," Mr. Linder says, "it's only the mean ones that are used."

"But they are really mean."

Has Rare Pet, Black Gopher

BATTLEFORD, Sask.—Emile Bidart has a rare pet—a black gopher.

He found it recently and took it home for a few days to let town youngsters have a look at it.

The black gopher liked the Bidart family food hand-outs and now shows no inclination to leave.

Black gophers are even rarer than the albino or white ones.

RESULT OF POOR JUDGMENT ON PILOT'S PART!—A case of poor judgment proved painful to Gerald Barter of Toronto, who suffered numerous cuts and bruises after he had beached his light seaplane on Lake Kashagawi, about 23 miles north of Minden, Ont. Barter, alone in the plane, was flying to visit friends when he discovered that he was about to land on wrong lake. Unable to gain sufficient altitude to clear trees bordering the water, the pilot cut his motor and glided into shore. In the pile-up that followed, Barter received numerous cuts on his head, but was not seriously injured.—Central Press Canadian.

Tuberculosis Surveys Planned For Far North

OTTAWA.—Plans are being made to send an x-ray party along Canada's western Arctic coast this summer as part of the program to control tuberculosis among Indians and Eskimos.

This was disclosed here by Hon. Paul Martin, minister of National Health and Welfare, whose department administers health services for the Indian and Eskimo population.

The x-ray party is scheduled to leave Aklavik late in July on the Hudson's Bay boat, the Fort Hearne, and will visit such places as Holman and Read Islands, Coppermine, Cambridge Bay and Bathurst Inlet. The medical group will be headed by Dr. A. Laurent-Christensen who has had long experience with the Eskimo people and speaks their language.

Since systematic x-ray surveys were begun in 1946, the number of active cases of tuberculosis found among the Indians and Eskimos has steadily declined until the number is now about half what it was five years ago, Mr. Martin said. This case-finding program, along with enlarged hospital facilities for treatment, has brought about a corresponding decline in the tuberculosis death rate among Indians.

X-ray surveys in Alberta, the Yukon Territory and the Mackenzie district of the Northwest Territories are organized from the Charles Cammell Indian Hospital, Edmonton.

This year's program is already well under way, Mr. Martin noted. Most of the Indians in southern Alberta were x-rayed in April, with those around Edmonton being done in May. As the season advances, x-ray groups will move along the Alaska Highway, into the Yukon and down the Mackenzie Valley.

Quick Canadian Quiz

1. What Canadian minister's son gained fame teaching medicine in Canada, the U.S. and Britain?
2. The railway industry employs how many?
3. Canadians will spend how much this year in retail stores?
4. Of our 3,845,144 sq. miles, how much is taken up with farming?
4. Last year did we produce 7, 17 or 21 million barrels of flour?

SMILE OF THE WEEK

The boy walked up to his father and said, unhesitatingly, "Dad, here is my report card—and one of yours that I found in the attic."

The first naturalization act was passed by the first Congress of the United States on March 26, 1790.

GEMS OF THOUGHT

HUMILITY

All of you be subject one to another, and be clothed with humility: for God resisteth the proud, and giveth grace to the humble.—I Peter.

Human pride is human weakness. Self-knowledge, humility, and love are divine strength.—Mary Baker Eddy.

I believe the first test of a truly great man is his humility.—Ruskin.

If thou wouldst find much favor and peace with God and man, be very low in thine own eyes. Forgive thyself little and others much.

—Leighton.

He that places himself neither higher nor lower than he ought to do, exercises the truest humility.

—Colton.

The tumult and the shouting dies; The Captains and the Kings depart; Still stands thine ancient sacrifice, An humble and a contrite heart.

—Rudyard Kipling.

BRIDGE-PLAYER'S DREAM

CRANBROOK, B.C.—Mrs. W. A. Fergie picked up a 13-heart bridge hand, kept her head and worked herself into a bid of seven hearts redoubled. She cleaned up 2,040 points.

Saskatchewan Famous As Game Bird District

Saskatchewan is probably the greatest game bird district in Canada and every year hunters from all over the North American continent visit the province to try their luck.

The southern prairies form a natural home for upland game birds and prairie chicken, Hungarian partridge and grouse are plentiful in most sections, attracting thousands of hunters in the fall shooting season.

Duck and goose shooting is a major sport also. Millions of ducks and geese stop off at Saskatchewan watering places during their annual trip to the south. Lakes and sloughs in the southern part of the province provide feeding grounds for the south-bound birds. When they begin to arrive from the north, harvesting is usually completed and stubble fields provide choice grain to fatten the birds for the table.

Moose, deer and woodland caribou roam through the thickly wooded sections in northern Saskatchewan and big game hunting of this type brings more visitors to Saskatchewan each year.

The average elephant lives 150 years.

Savory Potato Salad

(By Marye Dahnke)

In the countries where citrus fruits and tomatoes are on the hard-to-get list, potatoes do double duty in daily menus. They are not only a staple food, ranking in importance with bread, perhaps, but also are counted on to contribute that all-important vitamin C.

Here, where fruits and vegetables sparkle on every side, and are a major source of vitamin C, we choose potatoes daily, too, for their good flavor and adaptability.

In summer menus potatoes star in salads. We like them cold—and gold in color with their dressings. We like them hot, and spiced with vinegar dressings.

For your next potato salad, use this recipe to win compliments. You make it hot, and serve it cold.

- 4 cups sliced hot potatoes
- 8 slices crisply broiled bacon, crumbled
- 12 stuffed olives, sliced
- 1 teaspoon chopped chives

- ½ cup Miracle Brand French dressing
- Salt, pepper
- Lettuce
- Onion rings

Combine the potatoes, bacon, olives, chives and French dressing. Toss lightly and season to taste with salt and pepper. Cover and chill in the refrigerator several hours. Serve on crisp lettuce garnished with onion rings.

Map Of Regina Chosen For Floor Design

REGINA.—When Joy Sundeen was a resident of the Richardson, Sask., district, her friends often received letters in which most of the news was depicted by clever drawings.

Joy, now is a 1950 graduate in architecture of the University of Manitoba and hopes to become a licensed architect after completing further examinations.

Working for a Regina firm, her drawings and ideas have paid off. The proprietor of a marble, tile and terrazzo company asked for a floor design which would be emblematic of his trade. The job was assigned to Joy.

The work called for a suitable design for the floor of the front office which would include 70 kinds of terrazzos, or marble chips.

Miss Sundeen chose the map of Regina for the design. Various blocks are set out in the varied terrazzos, including a few buildings, the railway with a miniature train complete with smoke, the airport, Wascana lake and creek bed, and—a touch of humor.

In one section is the emblem of the tile-laying trade, a little man with a trowel on a partly-completed floor. There is another little man enjoying a meal from a lunch box.

"This was purely accidental," Miss Sundeen explained. "I was doodling when I drew the second little man and when the proprietor saw my work, he insisted that it be included."

Most of the terrazzo chips were shipped in 100-pound bags from the United States. But a few were from Italy and two were from Canada.

There is red verona, named from the Italian district from which it comes; Georgia white from the state of Georgia; Verda Antique, which is green in color; Belgian black; Red Levante, a red and green mixture; pink Tennessee, and Botticino, which is cream.

To Check On Tax Evaders

OTTAWA.—Income tax officials said a campaign has been started to see if businessmen and other self-employed taxpayers may be making fraudulent tax returns.

A revenue department spokesman said the campaign will continue for the next year or two.

Helpful Hints

Oil paint on radiators in the home makes them look better and actually will let more heat into the room; metallic paints hold heat in. You can paint your radiators to match the walls, so that they become part of the background and are not conspicuous.

If cotton is wound around the fire-proof handle of the electric iron the hands will not feel so dry and uncomfortable after doing the weekly laundry.

When blankets are to be laundered select a mild, clear day for doing it. Avoid the hot, cold or rainy days.

Dark corners, bad for bookworms, are excellent for bookshelves. Heat or sunlight are both injurious to bindings and covers, so store your volumes away from the windows.

ANSWERS TO QUICK QUIZ

ANSWERS: 5. 21 million barrels, 3. About \$9 billion. 1. Sir William Osler, 4. 267,361 sq. miles. 2. 185,000 men and women.

(Material supplied by the editors of Quick Canadian Facts, the handbook of facts about Canada.)

Only one per cent. of all prisoners in America die or are executed in prison.

W. A. BRAISHER

A wedding social was held in the dining room of Carbon Baptist Church Tuesday evening of last week in honor of Mr. and Mrs. Raymond Harsch, who are visiting relatives here following their honeymoon. The greater part of the evening was spent in playing games under the leadership of Mrs. Art Biebrick and Richard and Alvin Harsch. Following games a short program was rendered and a delicious lunch served. Hosts on the occasion were parents and relatives of the groom. Guests included the bride's father, Mr. Herman Kern and family, and relatives from Olds.

Mr. and Mrs. Harsch left Thursday for Wetaskiwin where they will begin mission work among the Indians of Alberta.

Mr. and Mrs. E. Maxwell and Mr. and Mrs. Leon Coates have returned from a motor trip to Lethbridge and Magrath, where they visited with relatives.

Clarence Riggs, Carbon Oldtimer, Dies Saturday

Clarence Riggs, an old time resident of the Carbon district, died in Drumheller hospital Saturday, July 21, at the age of 80 years. Surviving are his wife at Carbon and a sister in the United States.

Born in 1871 at Walla Walla, Wash., Mr. Riggs moved to Carbon in 1904 and took up a homestead. He married Elizabeth Denning in 1917 and in 1942 the couple retired to Carbon where they resided until his death.

Funeral services were conducted from Christ Church, Carbon Monday afternoon at 4 p.m., with Rev. G.B. Hotchkiss officiating. Winter's Funeral Home of Drumheller was in charge of arrangements and interment was made in Carbon cemetery. Pallbearers were C. H. Nash, F. J. Bessant, W. A. Braisher and Jas. Flaws.

The United Church Junior Ladies' Aid held a farewell party for Mrs. Jack Hughes Tuesday evening at the home of Mrs. Francis Poxon. Contests were enjoyed during the evening, with prizes going to Mrs. Poxon, Mrs. Ben Fox and Mrs. Ernie Fox.

Mrs. Ed Ohlhauser, president of the Aid, presented the guest-of-honor with a spoon on behalf of the members. A delicious pot luck lunch was served.

LITTLE NEWS ITEMS OF LOCAL INTEREST

Mr. and Mrs. Renold Neher and family returned Saturday from a motor trip to Wainwright and Edmonton, and visited with friends at Leduc.

Mrs. Jim Murphy and infant son have returned to Herronton, following a week's vacation at the home of Mrs. F. Heath.

Mr. and Mrs. Fred Maxwell of Raddison, Sask., were recent visitors at the home of Mr. and Mrs. Ernie Maxwell.

Mr. and Mrs. Ed Rouleau of Didsbury and Mr. and Mrs. Frank Emery of Acme were Carbon visitors Sunday.

Miss Doreen Hay underwent a tonsil operation in Drumheller hospital Tuesday.

Hesketh and Pope Lease News

Mr. and Mrs. Maurice Grenier recently celebrated their golden wedding anniversary with a family reunion. Mr. T. Grenier, K.C., and Miss Irene Grenier were present from Ottawa to wish their parents continued long life and happiness.

Earl Fraser underwent an appendix operation in Drumheller hospital and is progressing favorably.

Mr. and Mrs. Bill Church, Mr. and Mrs. Joe Rowbottom, George Bacon and nephew, Bobby Norton, are holidaying at Pine Lake. Bobby has been spending his holidays with his grandparents, Mr. and Mrs. Jim Bacon.

Mr. D. Edmundson is a patient in Drumheller hospital.

Pope Lease W.I. met at the home of Mrs. Otto Pallesen July 18 where the members were host to 14 ladies from Horseshoe Canyon W. I. Fourteen Pope Lease members and three visitors were present. The tea prize was won by Miss Marjorie McKinnon.

The entertainment committee, with Mrs. Andrew in charge, provided a musical program. Mrs. J. Edwards sang a solo, accompanied by Miss Marjorie McKinnon at the piano. A violin and piano selection was rendered by Miss Gladys Crowell and Miss Marjorie McKinnon, and Doris McKinnon gave a recitation on "My Lost Spectacles."

A delicious lunch was served by the ladies and a pleasant afternoon enjoyed by all.

IN MEMORIAM

In loving memory of Richard Kary, who passed away July 24, 1950.

Memories are treasures no one can steal,
Death leaves a wound no one can heal,
Some may forget you, now now you are gone,
But we will remember, no matter how long.
Ever remembered by Mr. and Mrs. R. Kary and family

CARD OF THANKS

I wish to express my thanks to the Carbon organizations for the cash donations which made possible my attendance at the Carbon representative at the Leadership Training Camp at Jasper.

Lynn McCracken

CARD OF THANKS

I wish to thank all my neighbors and friends who sent flowers and helped me so much in my recent bereavement.

Mrs. Elizabeth Riggs

OIL MAKES A COUNTRY STRONG

"OIL NEEDS A LOT OF THINGS, JIMMY!"

"Tankers, Jimmy, are just one of the things the oil business needs. It needs supplies for pipe lines and new refineries. It needs tank cars and trucks and storage tanks. It needs workers and material from all parts of Canada."

Bringing you oil is a big job. It employs labor and skills and ideas across the nation. In the past five years Imperial Oil alone has undertaken to invest more than \$200 millions—about \$60 for every family in Canada. Much of this money has been spent to find and develop new oil fields in the prairies, fields which mean new prosperity and new security for all Canada. But almost half of it has been invested in new tankers and pipe lines, in new refining units and in facilities to bring the products to you.

With oil playing an increasingly important part in our daily lives, the oil industry's job is bringing new strength and better living for Canadians everywhere.
